

THE DOCTOR IS IN

Specialist Care

Refined hand and wrist surgery

The Centre for Hand and Reconstructive Microsurgery (CHARMS) was founded by Dr Lim Beng Hai on April 30, 2004. It is one of the first hand surgery centres in private practice.

Over the years, CHARMS has become a widely recognised centre dedicated to the practice of hand and reconstructive microsurgery.

Eminent surgeons

CHARMS' Dr Lim Beng Hai and Dr Aaron Gan have more than 25 years of hand surgery experience between them. They both have special interests in the treatment of degenerative conditions, such as hand and wrist arthritis, trigger fingers, carpal tunnel syndrome, as well as sports injuries, such as hand

and wrist ligament sprains and tears.

The two doctors also treat traumatic injuries, such as fractures and dislocations in the hand and wrist. These include distal radius and forearm fractures that are frequently emergency cases.

Extensive experience

Dr Lim and Dr Gan are experienced in conducting replantations and microsurgical revascularisations of fingers, hands, wrists, forearms, and the toes and feet.

Some examples of complex surgical procedures they have performed are – free tissue transfers, such as microsurgical free flaps for reconstruction and resurfacing of upper and lower limb

skin defects, as well as free toe-to-hand transfers for reconstruction of missing digits.

As experienced microsurgeons, they are also called to perform hepatic artery anastomoses for liver transplantations.

Competent staff

CHARMS has a team of highly-trained clinical staff. This includes several nurses and two experienced hand therapists to ensure a holistic approach in the care for patients. They believe that excellent outcomes can only be

derived from the delivery of quality of pre-operative, intra-operative and post-operative care.

CHARMS attributes its successes to the selfless dedication of these team members who take pride in their work to ensure patients are well taken care of.

The tireless work ethics of Dr Lim and Dr Gan mean they will continue to make improvements in their standard of care, consistently achieve positive results, and pursue better techniques to perform refined hand and wrist surgery.

CHARMS

Centre for Hand And Reconstructive MicroSurgery

Who We Are

The Centre for Hand and Reconstructive MicroSurgery is the longest-running Hand Surgery Centre in private practice.

The Difference of a Finer Touch
